

## From Our Founder Connie Cheren

There is a saying in Africa - it takes a village to raise a child. I can tell you it also takes many partners to reach those in need and to change their lives. PFC works with wonderful partners in the US and with dedicated partners in Kenya.

In this newsletter we share the stories of some of these partners. They represent many partners who help us reach thousands through our partner computer schools, mobility cart distribution, our sustainability programs, water backpack program, and malaria prevention through distribution of bed nets.

With the dedication and commitment of our partners PFC is giving the people of Kenya hope for a better future. We are grateful for each and every partner.

## A Message from Sammy Wanjau

Executive Director PFC Kenya

Our Spring 2021 newsletter featured some of our incredible US partners and underscored the importance of the work they help us accomplish. In addition to the resources and expertise partnerships bring to PFC, they help us extend the reach of PFC's work so we can change many more lives.

Sammy

This newsletter will introduce you to some of our Kenya-based partners. We love working with local organizations, nonprofits, schools and universities to expand the reach of programs like our sewing schools, computer schools, mobility carts, bed nets distribution, and water backpacks.

Working together allows our PFC staff to offer thousands of people all over Kenya, access to education, skills, and life-saving services that help improve their lives and those of their families. Our Kenya partnerships also help establish important relationships with local leadership, which are critical to sustainable life change within the communities we serve.

The PFC staff and I are grateful for all of our partnerships, in the US and in Kenya. It's a privilege to work together with like-minded organizations to change lives and bring hope for a better future to Kenya!

#### Honorable Martin Maskiko Moshisho Martine

Kiambu County Disability Network

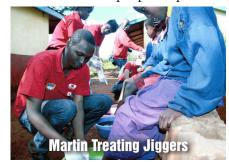

Connie Cheren, PFC President/
Founder met Martin when he
was the President of Mount
Kenya Student Associations
at Mount Kenya University
(MKU). PFC was hosting a
student team from Ohio State
University and a team from
MKU was joining us. Our
mission was to treat jiggers in
Marsabit, Kenya located about
10 hours by bus from Nairobi.

Martin was passionate about the mission and touched by the needs of the people he met. He treated jiggers and delivered water backpacks to schools. He went on to graduate from MKU with a degree in Business Management. After working for the university coordinating clubs and associations, Martin was elected as Deputy Governor in Kajiado County.

Soon after taking office Martin contacted PFC and helped fund the transportation costs for a full container of mobility carts. Martin remembered how people helped

him when he was in need as a child and he now wants to help as many people as he can. PFC is proud to call Deputy Governor Moshisho our partner.

Partners for Care works with those who represent persons living with disabilities to help reach the people who need a mobility cart. One of these groups is Kiambu County Disability

Network.

We were introduced to the Kiambu County Disability Network by Moses Ndichu, a PFC board member and

treasurer for the network. Registered as a Community Based Organization, the organization captures all sub county networks in the twelve constituencies in Kiambu County reaching over 330 groups that represent persons living with disabilities.

We have distributed over 900 mobility carts through our partnership. Through this partnership with Kiambu County Disability Network we hope Kiambu County will be the first county in Kenya to make mobility possible for all its citizens.

## **Joy Divine**

# Phanicey Foundation Computer School

Fred Mwaura is Founder of Joy Divine Children's Organization, a non-governmental organization that works in Mathare Slum, the second largest slum in Africa. Fred has dedicated his life to helping the youth in Mathare Slum not by handouts but by education and by helping

the physically challenged with mobility carts and coolers to set up small businesses.

Fred has raised funds to help with the transportation costs of the mobility carts. At Christmas he asked friends and churches to donate to his campaign "Let's Make Them Mobile." Fred has received 696 mobility carts through our partnership. The mobility carts have enabled recipients to go to school, work and even establish small businesses.

Connie Cheren, PFC President/Founder, had the privilege of helping assemble carts with Fred and his team when her son, Chris Eaton, and PFC Finance Director, Danny Kellenberger and his son Daniel, came to Kenya. It was a memorable experience both for Connie, her son, Danny

and Daniel. It is a blessing to know Fred and his team of volunteers who have helped so many youth in Mathare Slum. We look forward to a continued partnership with Joy Divine.

Phanicey was from a humble background with no formal education but she raised six children on her own and made sure they all received a formal education. Phanicey died from cancer in 2009 at the age of 50. Her son, Bright, wanted to carry on her spirited fight to help others. Bright founded Phanicey Charitable Foundation to reach the community through empowerment programs by providing life skills for sustainable livelihoods.

Our partnership with Phanicey Foundation Computer School started in 2018. PFC donated 10 computers to

Phanicey Foundation. To date they have graduated over 300 students. We are happy to help Bright continue the work of his mother. Her vision and warm heart continue to change the lives of Kenyans.

### **HEART - Health Education Africa Resource Team**

Connie Cheren, PFC President/
Founder first met Vickie Winkler
on one of her early trips to
Kenya. Vickie is a nurse and
she served as a missionary in
Kenya with her husband. After
the death of her husband, Vickie
continued to serve the people of
Kenya.

Vickie had been working in Kenya since 2000 and was experienced in how to help and not harm the people she served. Through the organization she founded called HEART (Health Education Africa Resource Team) a Christian humanitarian organization, Vickie was dedicated to empowering the people of Kenya to survive and thrive beyond the HIV/AIDS pandemic. Vickie was a good teacher

and mentor for Connie as she was establishing Partners for Care. Connie is grateful for Vickie's help and has been inspired by her work.

Part of Vickie's work through the Malaria Prevention Project is to help women learn to sew mosquito nets. PFC purchases these nets from HEART and distributes them to pregnant women, children 5 and under, the elderly, and those persons living with a disability. PFC has purchased over 4,000 nets from Vickie. One area where we distribute many of the nets through our program is Watamu in Kilifi County. During the rainy season, Kilifi County experiences a rise in malaria. The mosquito net prevents the bite from the mosquito that causes the deadly malaria. The nets have helped reduce the cases of malaria in Kilifi County.

We will continue our partnership with HEART and together fight malaria - one net at a time.

Honorable Wangui Ngirici wanted to help the people of Kirinyaga County. She knew they struggled with issues of access to safe drinking water. Many of the women carried water from the river in dirty jerry cans. Honorable Wangui decided to run for the position of woman representative for Kirinyaga County.

Honorable Wangui asked Partners for Care to help with her campaign. She purchased 800 water backpacks and branded them promoting her campaign. She donated the packs to women. The packs became "walking billboards" during her campaign. She became known as "Mama wa Maji" - Mother of Water for her passion to equip her community with safe water through the water backpacks.

Honorable Wangui won her election by a landslide. But the biggest winner were all the women who no longer used dirty jerry cans to carry their water.

Oasis Dynamo is a Community Based Organization established in 2015 to help communities through table banking. Their outreach has grown significantly since their inception.

Joel Alogo, Oasis Dynamo Operations Manager, learned about the work of Partners for Care through a newspaper story about PFC's distribution of mobility carts in Isiolo

through the office of Governor Honorable Dr. Mohamed Abdi Kuti. Mr. Alogo contacted us to learn about other PFC programs and decided he wanted to help with the distribution of bed nets.

Oasis Dynamo partnered with PFC to distribute the mosquito nets in the informal settlements (slums) of Mathare and Kariobangi. To date they have distributed 2,000 nets to pregnant women, children 5 and under, the elderly, and people living with a disability.

Oasis Dynamo has an efficient and effective monitoring and evaluation for all its programs including the distribution of the mosquito nets. There have been no reported cases of malaria for any of the recipients who have received a net.

We appreciate the good work of Oasis Dynamo and hope to distribute even more nets through our partnership preventing many more people from dying from malaria.

## The Still Bridge Project

SoundHire is one of Partner for Care's sustainability programs. When the music team isn't using their music equipment, they make it available for others to rent. Part of the program includes the music team

performing at weddings and revivals. They also record artists in the PFC recording studio located at the PFC House.

Since 2016 The Still Bridge Project has partnered with PFC both as a renter for their outreach events and by connecting other groups to the services of SoundHire.

Future plans include helping to identify young talent who can record in the PFC recording studio. As Kenya moves beyond the pandemic, music will play an important part in restoring joy and healing to the people of Kenya.

# Saving Lives

## **Prison Computer Schools**

### Lawy Afrik Technology Limited

Partners for Care partners with Zetech University and Kenya Prisons to train inmates on computer skills as a way of rehabilitation to help prepare them to join society when they have completed their sentence.

Through this partnership, five computer schools have been successfully opened. Partners for Care has donated 50 machines to the prisons with each class having 10 computers. The prisons that have benefited so far are:

- Langata Women's Prison
- Kamiti Maximum Prison
- Nairobi West Prison
- Industrial Area Prison
- Jamhuri Prison

Most inmates in these prisons serve a short sentence of 6 months to 2 years. Since inception more than 400 inmates have graduated from the computer classes.

Among the beneficiary is Moses Maina who secured a job in a local supermarket as a cashier after serving his time of 8 months. He was among the first class to graduate in Jamhuri prison. He expressed his gratitude saying the skills he learned in the computer school helped to change his life.

Lawy Afrik Technology Limited is one of our new sewing program partners. The organization was founded by Amos Onyango and their goal is to help improve the lives of vulnerable persons through locally available solutions.

In March 2021, Lawy Afrik Technology Limited opened their sewing school with 10 PFC sewing machines. These sewing machines are sent to PFC in our mobility cart containers from Mobility Worldwide - MO Columbia. The used sewing machines are donated to Mobility Worldwide and two dedicated volunteers (Jim Sandfry and Jim Weisbrook) repair them and prepare them for shipping. To date we have received 239 sewing machines and have established 21 partner sewing schools like Lawy Afrik Technology Limited.

Lawy Afrik Technology Limited has enrolled 41 students who are learning sewing, fashion design and tailoring. One of the students, Wilson Robin Marwa, has already begun a tailoring business.

Amos hopes to train 240 students this year. That is 240 families that will be helped. Lawy Afrik Technology Limited is a strong partner and we look forward to seeing his program grow.

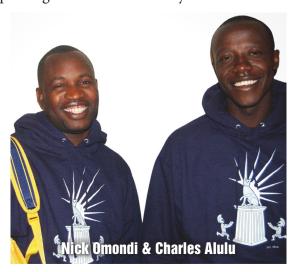

#### Partnering for hope and health in East Africa

#### **Tree House Computer School**

Connie Cheren, President/Founder of Partners for Care met two young men, Nick Omondi and Charles Alulu, when she first started working in Kenya. These two young men grew up in Mathare Slum and had a passion to help those who lived in this slum. They started an NGO and later PFC helped them build a children's home they named Tree House.

Recently, Tree House became one of our partner computer schools. They have graduated 45 students and currently have 40 students enrolled. They are helping the children who live at Tree House as well as the people who live in the surrounding neighborhood to learn computer skills. These skills, along with their schooling, will help them find a job or start a business.

Connie is proud of Nick and Charles as they continue to serve and help others. They are an inspiration to others as they follow their passion to help change the lives of so many.

#### **Tumutumu School**

Tumutumu School for the Deaf is the only special school located in Nyeri County for students with a hearing impairment. It was established in 1970 by the Presbyterian Church of East Africa (PCEA).

The school came to know about PFC through Charles Mathenge our Deputy Director who is from the same county. PFC donated 10 computers to the school in 2016 and since then over 100 students have graduated from the school. After PFC donated the computers, the area member of parliament purchased a printer and a projector for the school.

PFC has also partnered with the school to distribute bed nets and mobility carts. Charles is happy he could help the community where he grew up.
