2020 ANNUAL REPORT

partners for care

From

OUR FOUNDER

Last December, we set the Partners for Care program goals for 2020. These goals were set before the world experienced the Covid-19 pandemic. Like every country in the world, Kenya was hit with the virus. The PFC staff wanted to continue to serve - to do the best they could to meet their program goals.

We bought bicycles so the staff wouldn't have to ride public transportation, and we sent personal protection equipment (PPE) so staff could continue to serve while staying safe. They treated people infected with jiggers while wearing masks and face shields. They saw patients in the medical clinic and distributed bed nets while wearing PPE. They repurposed the water backpacks to be used as handwashing stations to help stop the spread of the virus.

Our staff have continued to serve and all remained safe. We are grateful for their safety and for your support through this difficult year. Without your support, PFC would not have been able to serve those most in need.

As this difficult year winds to a close, it would be easy to dwell on all the bad things. The Coronavirus changed our world in ways none of us could have imagined. But instead of the bad, what really comes to mind as I reflect on this year, is all the good!

When Covid-19 hit and the world went into lock down mode in mid-March, our staff and those we serve stood to lose so much. How could we keep working during a global pandemic? How would we stay safe and still reach and serve those in need? Would our staff even have a job? Partners for Care, like every organization, was faced with a very uncertain future. And people's lives were depending on us.

But we needn't have worried for long. The support we received from our amazing donors humbled and inspired us! PFC donors stepped up to raise the funds needed to supply our staff with Personal Protective Equipment and bikes for our staff so we could keep safe while serving others. Donors raised the funds needed to re-purpose thousands of water backpacks to serve as hand-washing stations, to help stop the spread.

So yes, it was a very difficult year for sure. But we are reminded of just how blessed we are to do this work and to have the support of our donors and partners, even in the midst of a global pandemic.

Gratefully,

Sammy
